

Quick Start Guide

NOKIA

Thank you for purchasing Nokia FastMile 5G Gateway

In the box you will find:

1x 5G Gateway
1x Power supply
1x AC cable

1x Quick Start Guide
1x Warranty and Safety Cards

1. Insert SIM card

Unbox and place your FastMile 5G Gateway in an area with few obstructions, ideally near a window area. Make sure there is a nearby power outlet.

Insert the SIM card if not pre-installed by your service provider. Unplug the Gateway, remove the SIM tray and place the SIM card securely in the tray and reinsert it into the Gateway.

2. Power on

Plug in the power adapter and then connect it to your Gateway. Push the on/off button, and the screen on top of the Gateway will turn on after max. 12 sec.

Your Nokia 5G Gateway will start to search for the best 5G or 4G connectivity.

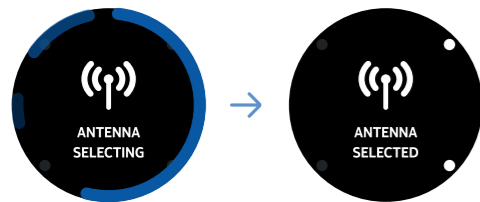

3. Gateway placement

For the best user experience, place your Gateway where the 5G signal is strongest. Similarly to your mobile phone, your 5G Gateway display up to 5 bars to identify the signal strength.

You can check for the 5G or 4G signal strength on the device screen. You may try several locations inside your house to find the best possible signal.

4. Antenna selection

In the power up phase the Gateway searches for the best connectivity. Dots on the LCD screen show the selected antenna.

You can restart the antenna selection by tapping the antenna dot on the LCD screen without restarting the Gateway.

5. You are almost there...

Once you've got a good signal, it's recommended that you do not reposition the Gateway.

If you have to move the Gateway, you may need to check the signal strength again.

6. Connect to Wi-Fi

Connect Wi-Fi devices to your Gateway using the SSID and Wi-Fi key printed on the bottom of the Gateway.

It is recommended to change the WiFi password for your security.

Enjoy your 5G Home Broadband

To manage your Wi-Fi network visit <https://192.168.1.1> or <http://192.168.1.1> in your browser.
